Claims 1-18 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Jones US 6,307,073 in view of JP 4-352771.

The references are applied in the same way set for the in the previous offices action. Applicants' comments have been noted and considered but are not deemed persuasive of patentability. Both palladium-free titanium zeolite and palladium-containing titanium zeolite catalysts are known in the art. It would have been obvious to one of ordinary skill in the art to modify the process of Jones to incorporate the teachings of JP 4-352771 et al in order to obtain the cumulative effects of the mixed catalyst system.

The idea of combining somewhat different but otherwise analogous catalysts flows logically from their having been individually taught in related processes producing the same epoxide products in prior art. In re Kerkhoven , 626 F.2d 846, 850, 205 USPQ 1069, 1072 (CCPA 1980).
